

INSTRUCTION TO AUTHORS

The authors willing to present papers in the conference are requested to submit the full length paper not exceeding 6 pages (in IEEE format) by e-mail as an attachment to icseit2025@stellamaryscoe.edu.in on or before the last date for submission. All the papers will be peer reviewed by the experts. Authors of the selected paper will be intimated through e-mail. The first author should incorporate the reviewer's comments and submit the camera ready paper along with the registration form. The registration fee includes Conference kit, refreshments and working lunch. Accommodation will be provided based on prior request with additional cost

NOTE

- Certificates and Lunch will be provided only to the Presented Author.
- For additional certificates and Lunch token, delegates have to pay extra Rs.200 each

IMPORTANT DATES

Process	Date
Submission of full paper	15th March, 2025
Notification of acceptance of full paper	20th March, 2025
Submission of camera-ready paper	31st March, 2025
Deadline for early bird registration	5th April, 2025

Date Extended for full Paper Submission: 06, April, 2025

ABOUT THE INSTITUTION

Stella Mary's College of Engineering, promoted by the Nova Educational Trust and established by Dr. Nazareth Charles, focuses on uplifting the underprivileged and women in society. The college offers a nurturing environment with cutting-edge infrastructure, aiming for excellence in academics and leadership skills. It emphasizes outcome-based education and has achieved NAAC and NBA accreditation within nine years. The institution maintains an exceptional placement record, providing ample opportunities for students to achieve their career goals.

VISION

To be a beacon of academic excellence, empowering future innovators with technical mastery to harness technology for positive global change.

MISSION

- To Cultivate a vibrant learning environment where students delve into the frontiers of technical knowledge, hone their problem-solving skills, and embrace innovation to transform ideas into solutions that address global challenges.
- To bridge the gap between technical brilliance and real-world impact by forging strong industry partnerships, fostering cutting-edge research, and nurturing entrepreneurial drive in our students, empowering them to build a better future through technology.
- To ignite the spark of intellectual curiosity within every student, equip them with the tools and knowledge to become pioneers in their chosen fields, and guide them towards ethical and responsible use of technology for the betterment of humanity.

ABOUT VEI TECHNOLOGIES

VEI Technologies provides a broad range of IT consulting, web applications, and outsourcing services through an optimized technique. It focuses on delivering business solutions for our client's business processes. We serve industry leaders as they need to improve their customer experience, expand market reach, and improve time to market with high professionalism and dedicated workers. They ensure timely completion of our projects.

ABOUT THE CONFERENCE

The International Conference on Sustainable Engineering & Innovative Technologies focuses on sustainability, engineering advancements, and technological innovation to tackle global challenges. It features keynote speeches, technical sessions, and workshops to discuss cutting-edge solutions in energy and the environment. The conference fosters collaboration among researchers, professionals, and industry leaders. It emphasizes interdisciplinary approaches for sustainable development. The event serves as a global platform for networking and knowledge exchange.

Track – 1

- Dependable, Reliable and Autonomic Computing
- Block Chain Technology
- Software Engineering & Data Analytics
- Machine To Machine Communication
- Social Transformation
- Computer Vision & Image Processing
- Augmented Reality & Virtual Reality
- IOT With Healthcare & Agriculture
- Distributed Data Analytics
- Multimedia And Multi-Structured Data
- Real-World And Large-Scale Practices of Big Data Data
- Engineering Applications: Healthcare, Financial Systems
- Internet Infonomics: E-Learning, E-Commerce, E-Business, E-Government, E-Society
- Internet Security: Biometrics, Boundary Issues, Broadband Access Technologies
- Swarm Intelligence, Ant Colony Optimisation
- Bioinformatics Databases, Data Visualisation
- Possibility theory, Bayesian networks, hidden Markov models
- Big Data and Network Security & Service Intelligence
- Image processing, simulation/modeling
- Big Data collection in Communication Networks
- Network management contingency challenges
- Telecommunications management and control of heterogeneous networks
- Mobility control and mobility engineering
- Communications networks security and wireless hacking
- Core technologies and access technologies and networks
- Mobile and Data Communication Systems
- Adaptive Techniques for Increased Network Performance
- Edge cloud computing
- Embedded and Ubiquitous Computing
- Artificial/computational intelligence
- Machine Learning and Deep Learning
- Feature selection, Dimension Reduction, Pattern Classification/Recognition
- Expert systems, Neural Networks, Fuzzy Logic
- Rough Sets, Granular Computing, Data Mining
- Evolutionary Algorithms, Learning Classifiers, SVM

Track – 2

- Waste Management
- Remote Sensing & Geotechnical
- Earthquake Engineering
- Bridge Engineering & Coastal Engineering
- Ecological Architecture
- Computational Mechanics
- Green Building Materials
- Environmental Engineering
- Clean Production Process
- Transportation Engineering
- Building Technology Science
- Landscape Planning and Design
- Traditional Construction Materials
- Disaster Prevention and Mitigation
- Civil and Architectural Engineering
- Construction Technology & Infrastructural Development
- Underground Facilities & Water Supply
- Smart, Biomaterials and Renewable materials
- Additive Manufacturing & Functionally graded materials
- Super alloys
- Heat Treatment of Materials & Powder Metallurgy
- Thin films and coating technology Surface Engineering
- Mechanical behavior of materials
- Material characterization, Non-Destructive Evaluation & Failure analysis
- Integrated computational materials engineering
- Innovative materials processing Technologies
- New and Renewable Energy
- Sustainable Technologies for Energy Conversion
- Energy Storage and Power Engineering
- Sustainable Cities, Architecture and Green Buildings
- Green Design, Products and Manufacturing Processes
- Heating, Ventilation and Air Conditioning (HVAC)
- Bio resource and Bio energy Hydrogen Energy and Hydrogen Production
- Energy Efficiency and Applied Thermodynamics
- Biofuel, Bioenergy, and Biorefinery
- Bioplastic, Biomaterial, and Advanced Material
- Biotechnology and Biochemical Engineering
- Chemical Reaction Engineering and Catalysis
- Combustion Technology, Tribology
- Industrial Safety Techniques -Industries 5.0
- Agricultural.Marine Machinery Technology
- MEMS,NEMS
- Waste to Wealth

Track – 3

- Power System
- Integrated Circuit
- Nano-Photonics
- High voltage & Insulation technology
- Power System & Protection
- Semiconductor Technology
- Automatic Control System
- Analog & Digital Circuit
- Design & Development
- Smart and Micro Grid
- Microwave Technology
- Signal and Image Processing
- Control & Automation
- Advanced Control Strategies In Electric Vehicle
- Smart Grid, Micro Grid And Demand Response
- Advanced Metering Instrumentation And Communication System
- New Advance In Energy Storage Technologies Like Battery, Ultra Capacitors, Super Magnetic
- Energy Storage Systems,
- Real Time Distribution Simulation
- Renewable Energy Sources
- Advanced Material For Photo Voltaic Cells
- Grid Integration Of Renewable Energy System Power Quality And Mitigation Techniques
- FACTS, HVDC, Custom Power Devices
- Signal Processing & Internet of Things
- Antenna Engineering
- Photonic Opto Electronic Structures / Devices
- Nanophotonics
- Consumer Electronics
- Smart Electronics Systems
- Low Power VLSI Circuits & Mixed Mode VLSI
- VLSI Verification And Testing
- Robotics And Automation
